SASQUATCH

“III”

From the vast and empty Rock and Roll wilderness comes a beast. Sightings are few and scattered but all reports contain the same basic facts. Three great lumbering giants, one guitar, one bass, two sticks and a monstrous noise. They devastate any stage set before them with bone crushing rhythms and ferocious riffs. They return every few years only to record and wreak havoc and then they disappear again just as quickly as they came. The beast has a name and it is **Sasquatch**.

Formed in Los Angeles back in the year 2001 by Philadelphia transplant **Keith Gibbs** and Detroit native's **Rick Ferrante & Clayton Charles**, **Sasquatch** has had the pleasure of refining their own brand of super heavy bone crunching rock and roll on the same stages with some of LA's finest including: **Fireball Ministry**, **Nebula**, and **Unida** which in turn, has quickly helped the band become a local favorite and has helped to develop a name that is synonymous with quality kick ass rock. In 2006, the need for new low end man came up, and **Jason Casanova** of **Tumbler** jumped in and delivered the goods. Drawing on influences from 70' metal, rock and psychedelia their songwriting approach is simple and mainly relies on the theories of feel and technique, a sorely missed aspect of most modern day rock amalgamations. But don't let their technique fool you, tight as they may be, when they come to play the kid gloves are off. Just ask any of the lucky folks who are already privileged enough to have seen them live, you will fully comprehend what we are talking about...

If any band in this century is fit to follow in the mighty Zeppelin's footsteps by naming each successive album with its corresponding Roman numeral, it has got to be **Sasquatch**. "III" picks up right where "I" and "II" left off. The men of **Sasquatch** turn the blues upside down, pass it under a stream of vintage psychedelia, puree it in and blender and then run it through Mojave Amplification. "III" is the sound of a band coming into its own, finding its footing and standing tall. The songs are thick and fully realized. The sounds resonate and run free like a beast in the wild. And with guests like **Monster Magnet's Ed Mundell** the surprises just don't stop. Look for the album in stores this April and on the road this Spring. Catch the beast before it disappears again between the trees.
